Introduction to AutoFlow Pro

AutoFlow Pro is an intelligent workflow automation tool designed to streamline repetitive tasks across departments. Whether you're automating data entry, email responses, or CRM updates, AutoFlow Pro reduces manual work by 80%.

Key Benefits:

- ✓ Drag-and-drop workflow builder
- ✓ 100+ app integrations (Slack, Salesforce, Gmail, etc.)
- ✓ AI-powered suggestions for optimization

Getting Started

System Requirements

These are the system requirements:

- OS: Windows 10+, macOS 12+, Linux (Ubuntu 20.04+)
- RAM: 4GB minimum (8GB recommended)
- Storage: 500MB free space

Installation Guide

Follow these steps to install the AutoFlow Pro:

1. Download AutoFlow Pro from www.autowflowpro.com/download.
2. Run installer and follow on-screen prompts.
3. Launch AutoFlow Pro and log in with your credentials.

Core Features

Creating Automated Workflows

To create a new workflow in AutoFlow Pro follow these steps:

1. Click **New Workflow** in the dashboard.
2. Name your workflow (e.g., Invoice Processing).
3. Add triggers (e.g., When a new email arrives).
4. Define actions (e.g., Extract data and save to Google Sheets).

Pre-Built Templates

Don't know where to start with creating your templates? Use our pre-built 50+ templates for:

- ✓ Marketing: Auto-responder, lead nurturing
- ✓ Sales: CRM updates, follow-up reminders
- ✓ HR: Employee onboarding, payroll triggers

Advanced Customization

API Integrations

1. Navigate to Settings > API Connections.
2. Enter your API key (e.g., from Zapier or custom apps).
3. Test the connection and save.

Conditional Logic

Use "If-Then" rules to create dynamic workflows:

- Example: "If the email contains 'urgent', then forward to manager."

Troubleshooting & Support

For common issues, see the table below for possible solutions.

Issue	Solution
Workflow not triggering	Check trigger settings and permissions
API connection failed	Verify API key and internet connection
Slow performance	Close background apps, upgrade RAM
